Day 4 of Hackathon

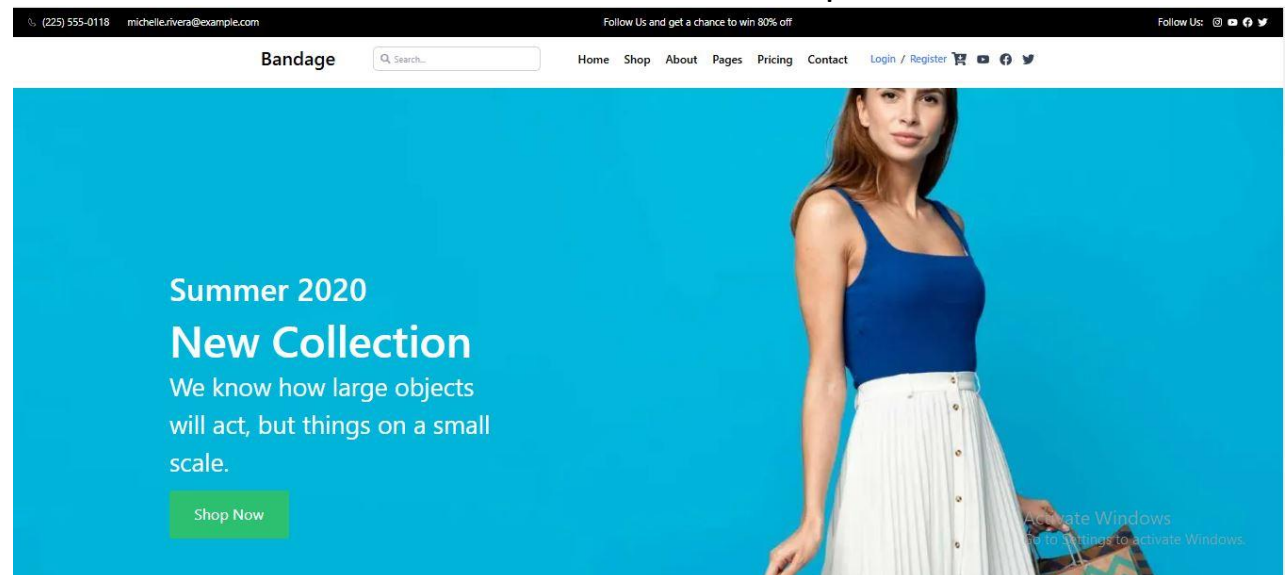

Dynamic Frontend Components

E-commerce

FUNCTIONAL DELIVERABLES:

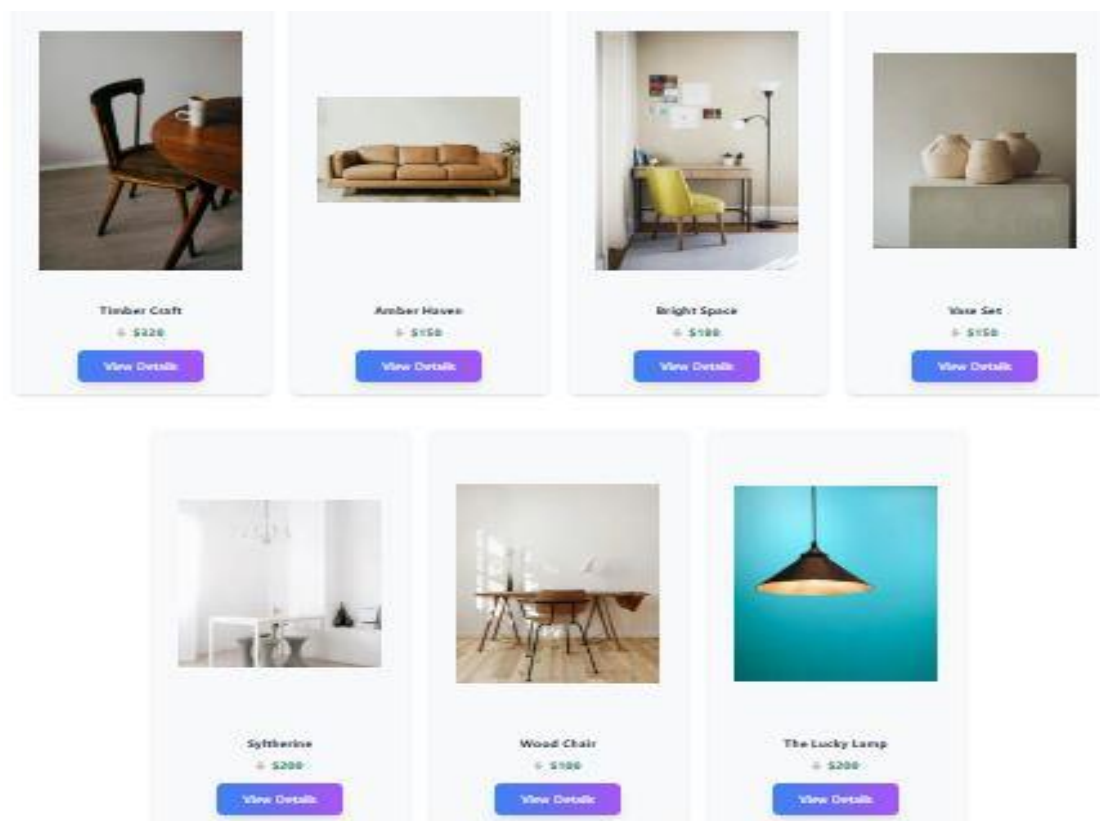

1. FRONTEND :

The homepage serves as the primary landing page of the website, designed to provide users with an engaging and intuitive entry point. It showcases key content, navigation options, and essential features to ensure a seamless user experience.

2.PRODUCT LISTING PAGE COMPONENTS:

The product listing page dynamically showcases a collection of products fetched from an API. It ensures real-time updates by reflecting the latest data from the backend, providing users with an up-to-date experience. The page dynamically renders product details such as names, images, prices, and descriptions based on the data received.

3. Individual Product Detail Pages:

Each product on the listing page is linked to its dedicated product detail page. This page provides comprehensive information about the product, including its name, detailed description, price, images, and availability status, offering users a complete overview of the item
